YOUR COURSE, YOUR WAY - MORE EFFECTIVE IT TRAINING

Introduction to Bootstrap

Duration: 2 days

Overview:

Our Bootstrap training course is aimed at web developers who want to be able to rapidly create and deploy responsive, engaging and beautifully laid-out websites and web applications using the Bootstrap framework.

Bootstrap consists of HTML and CSS-based templates covering forms, buttons, navigation and typography, and has played a major part in the design principles of the current wave of cutting-edge websites.

Prerequisites:

Delegates should be comfortable with the fundamental principles of web design / development using HTML and CSS.
