YOUR COURSE, YOUR WAY - MORE EFFECTIVE IT TRAINING

Creating HTML Email Newsletters

Duration: 1 days

Overview:

In this course you will learn how to create HTML based newsletters. We also discuss what we should use and avoid when creating HTML emails, as one of the main problems with e-newsletters is that they do not display correctly in all email clients.

The course practically shows each step of creating an HTML newsletter using HTML, testing and sending the email. In this course we will use hand-coding HTML to create modern E-newsletters with graphics, colour and text.

Prerequisites:

This course is for you if you are interested in creating HTML email newsletter for yourself or for others. No previous knowledge is required but prior knowledge of HTML and CSS would be usefull.
